POTUGARI GOUTHAM GAGAN

B.Tech Computer Science & Technology | Software Development | AI & Web Technologies

+91 7997992042 • gouthamgagan2442@gmail.com • github.com/goutham2442-star

PROFILE

Computer Science & Technology undergraduate at Takshashila University with a Year 1 CGPA of 8.67/10. Hands-on experience building AI, cybersecurity, predictive analytics, and modern web applications. Strong interest in software engineering, artificial intelligence, data-driven systems, and product-oriented development.

EDUCATION

Takshashila University
B.Tech – Computer Science & Technology
2025 – 2029

Year 1 CGPA: 8.67/10
Sem 1: 9.02 | Sem 2: 8.31

Edify Junior College | Higher Secondary Education – Class XII

TECHNICAL SKILLS

Languages	Python • C • JavaScript • TypeScript
AI / ML	TensorFlow/Keras • RNN/LSTM • Prompt Engineering • Gemini API
Web	HTML5 • CSS3 • React • Next.js • Vite • Tailwind CSS
Backend / Data	FastAPI • SQLite • Pandas • Data Analytics
Tools	Git • GitHub • VS Code • Chrome Extension / Manifest V3
Core	DSA & Problem Solving • OOP • Frontend Development • Software Design

SELECTED PROJECTS

Phish Hunter AI

Next.js • React • TypeScript • FastAPI • Python • TensorFlow/Keras • RNN/LSTM • Gemini • SQLite

- Built an AI-powered cybersecurity platform that analyzes emails, messages, URLs, and QR-code links for phishing risk.
- Implemented risk scoring, explainable AI reasoning, threat analysis, scan history, and security recommendations.
- Designed a Chrome Extension workflow for browser-based phishing analysis with a FastAPI backend.

RegionOS

React • TypeScript • Vite • Frontend Architecture

- Developed a frontend prototype for university/campus governance with authentication, dashboards, and modular service boundaries.
- Implemented Faculty, Fees, Placements, and Power BI/Analytics consoles with filters, pagination, charts, and interactive workflows.

LifeOS

Flutter • Dart • Material 3

- Designed a personal operating system prototype combining planning, universal app search, knowledge management, wellness, and Life AI.
- Built reusable UI components, micro-interactions, animations, and a centralized design system for a consistent mobile experience.

Workforce Prediction System

HTML • CSS • JavaScript • Data Analytics

- Built a workforce management system for forecasting resource requirements and workload distribution.
- Added workload-risk detection, skill-gap analysis, and staffing recommendations using data-driven approaches.

StudyMind AI

TypeScript • AI

- Designed an AI-assisted educational platform focused on personalized learning workflows and study productivity.
- Used TypeScript to structure a scalable and type-safe application architecture.

EXPERIENCE

InAmigos Foundation — Web Development Intern | Web Development / UI-UX

- Created and improved responsive NGO webpages as part of a structured web development internship.
- Worked on website improvement analysis, AI-assisted website generation, and Figma-based feature design.
- Developed an official NGO frontend using React/Vite with modern styling, Framer Motion animations, and donor/volunteer-focused sections.

ADDITIONAL PROJECT

InAmigos Foundation – Official Webpage | React • Vite • CSS • Framer Motion • Lucide React

- Built a modern frontend for an NGO website with responsive layouts, smooth animations, and structured impact/initiative content.
- Focused on clear information architecture and user engagement around donation and volunteer actions.

ACHIEVEMENTS

- Academic Excellence: Year 1 CGPA 8.67/10; Sem 1 SGPA 9.02 and Sem 2 SGPA 8.31.
- Hackathon Project: Developed Phish Hunter AI as an AI-powered cybersecurity/phishing detection prototype.
- Project Execution: Built multiple AI, analytics, software, and web projects during the first year of engineering.
- GitHub Portfolio: Maintains public repositories demonstrating practical development and version-control experience.
